2000 calories a day is used for general nutrition advice, but calorie needs vary.

Nutrient values are based on data from the USDA and our suppliers. Unplanned product substitutions, changes in product specifications and other factors may result in nutrient content variations. Be aware that we handle and prepare egg, milk, wheat, shellfish, fish, soy, peanut and tree nut products, and other potential allergens in the food production areas of our facility. Due to these inherent variabilities, guests with food allergies or other specific dietary concerns should speak with a manager for individualized assistance. Trans fat values are derived from those in animal protein and dairy products, not added/artificial trans fat such as those in baked goods and snack foods for which our standard is 0g.

These item is produced in a facility where wheat, eggs, milk, soy and peanuts and/or tree nuts are used.
